

# Loom Band NOA

Loom Band NOA is made of 5 separate looms which need to be joined together as you go along.

Use 8 sets of double bands and create your first loom length.

Weave the bands through each other

Tie off with a single band. Remove from the loom.

With the band used to finish the length, wrap it around the end of the finished length with a twist - or two if needed.

The black double band in this picture will form the centre of NOA and will be used as the start for each of the next 4 lengths.

Set up length 2 with 8 double bands.

Find the central band (black in this example) and twist it around the start of the next length once.

Create your next loom length finish with a single band and remove from the loom.

Repeat for lengths 3, 4 and 5 and you should have your own NOA!

Experiment with different colours and patterns.

Have fun!!
